Hoasi® Data Sheet

Hoasi® integrated mulching system type Land – Musk – Lawn - Bark is realised on a polyester nonwoven base nontoxic, nonputrefying, bacterial and rodent proof stable in a pH range between 3 and 9 and insensible to the normal environmental chemical factors

hoasi® has been tested against " UV and atmospheric aggressives " according to UNI EN 29073-3 & UNI EN 12224 norms hoasi® resistance against chemical aggressives (manure, herbicidal, anticryptogamic) has been also tested with 100% success

hoasi® is perfectly draining - hoasi® stops rain and hail impact, preventing the damages of rain flow effect on the embankments

hoasi® is a real antierosion defence of soil

the hydraulic characteristics of hoasi® create and maintain an optimal microclimate for vegetation – the temperature control assured by hoasi® prevents the infesting growing and the solarization effect helps the disinfection of the parasites of the soil

hoasi® type Lawn and Bark have an appropriate solidal band for the lateral earth covering and, when necessary, for the overlapping

hydrolysis resistance
EN ISO 12447

minimum durability 25 years in natural soils with 4 < pH < 9 and
temperature < 25°C
